SIDE EFFECTS

Most T-boosters hide behind proprietary blends and under-dosed fillers. TestoLink does the opposite. This document lays out every ingredient, every dose and every reason it earned its place in the formula.

Read it. Compare it. Take it to your doctor. We have nothing to hide.

The Formula - Part 1

Ashwagandha KSM-66

PATENTED ROOT EXTRACT • WITHANIA SOMNIFERA

The world's most clinically studied Ashwagandha extract. KSM-66 is the gold standard — a patented full-spectrum root extract with the highest concentration of withanolides available on the market.

300 mg

- Clinically shown to raise free testosterone
- Lowers cortisol and stress hormones
- Improves strength, recovery and muscle mass

D-Aspartic Acid

RESEARCH-BACKED AMINO ACID • D-AA

A powerful amino acid that signals the brain to release luteinizing hormone — the hormone that tells your testes to produce more testosterone. Clinical-grade dose included at the level used in human studies.

1,500 mg

- Triggers natural testosterone production
- Enhances muscle strength and output
- Improves sperm quality and male fertility

Fenugreek Extract

STANDARDIZED HERBAL EXTRACT • TRIGONELLA FOENUM

Standardized extract concentrated for active saponins — the compounds responsible for Fenugreek's hormone-supporting effects. Clinically shown to maintain healthy free testosterone and libido in active men.

500 mg

- Supports free testosterone levels
- Improves strength and exercise output
- Maintains healthy cholesterol balance

The Formula - Part 2

Tribulus Terrestris

PREMIUM BOTANICAL • TRIBULUS TERRESTRIS

A legendary male vitality herb used for over 2,000 years. Our extract is standardized for steroidal saponins — the bioactive compounds behind Tribulus's reputation for libido, drive and performance.

500 mg

- Supports healthy testosterone levels
- Boosts libido and sexual performance
- Enhances athletic output and drive

Horny Goat Weed

TRADITIONAL MALE TONIC • EPIMEDIUM • ICARIIN

Standardized for icariin — the active flavonoid that powers Horny Goat Weed's reputation as one of the most potent natural male vitality herbs in traditional Chinese medicine.

200 mg

- Increases libido and sexual function
- Supports healthy testosterone response
- Boosts energy, drive and vitality

Zinc

ESSENTIAL TRACE MINERAL • BIOAVAILABLE FORM

A critical mineral directly involved in testosterone synthesis. Zinc deficiency is one of the most common causes of low T in men — and supplementation at this daily level directly supports natural hormone production.

15 mg

- Directly supports testosterone synthesis
- Strengthens immune function
- Promotes muscle growth and recovery

Why the doses look the way they do.

Every ingredient in TestoLink is a standardized, premium extract — not cheap crude powder. One milligram of KSM-66 Ashwagandha isn't the same as one milligram of generic Ashwagandha. Standardized extracts concentrate the active compounds, meaning you get the clinical effect at a lower dose, without the risks of mega-dosing crude herbs.

We chose the doses used in human clinical trials — not the 'max load' doses you see on cheap supplement shelves. Why? Because more isn't better. Research-backed is better. Safe is better. Sustainable is better.

This is why TestoLink can be taken daily, long-term, without the commitment, blood work, or side effects of TRT.
